

ERP Documentation – 2. Non-Academics Department

*Version 0.1 (draft, built from your notes; items marked **[Proposed]** are my suggestions for you to confirm)*

1. Purpose and Scope

Non-Academics supports the school's operations: stores and inventory, transport, housekeeping, maintenance, IT, records, cameras, and security. It **receives requests from Academics and every other department** and runs its own duty allotments, checklists and purchase workflows.

Sub-departments

1. Joint Director and Joint Director Assistant
2. Stores (inventory and purchase)
3. Transport (Manager, Driver, Conductor)
4. Housekeeping
5. Maintenance
6. System Admin (IT Support)
7. Camera Room (CCTV)
8. File Room
9. Security (gate) **[Proposed]**
10. PRO (Public Relations Officer) **[Proposed]**

Housekeeping and Maintenance are **separate departments**, each with its own duty allotment, schedule and checklist.

2. Roles and Hierarchy

MD → Joint Director → Joint Director Assistant → Department Heads (Store Officer, Transport Manager, IT Head, Housekeeping Head, Maintenance Head, Camera Room In-charge, File Room In-charge) → Staff

Role	Responsibility
Joint Director (JD)	Oversees all non-academic departments. Approves purchases, budgets usage, inter-department instructions, escalations.
Joint Director Assistant	Coordinates daily operations for the JD: duty allotment review, checklist monitoring, first-level approvals.
Store Officer (SO)	Manages inventory and issues. Compares vendor details for purchases.
Transport Manager	Manages vehicles, routes, driver and conductor duties, vehicle records and student transport records.
Driver / Conductor	Update daily onboard/offboard and pickup/drop status.
Housekeeping Head and staff	Cleaning duties, checklists, supplies requests.
Maintenance Head and staff	Repairs, preventive maintenance, ticket resolution.
System Admin (IT Support)	Tickets for hardware/software, user access, ERP configuration support, devices.
Camera Room In-charge	CCTV monitoring and footage requests.
File Room In-charge	Physical and digital document custody and retrieval.

3. Module Map

#	Module	Owner
1	Dashboard and Analytics	All roles
2	Inventory Management	Store Officer
3	Purchase Workflow	Store Officer → JD → Finance
4	Request and Approval (Store issues)	All departments
5	Ticketing (repair, cleaning, IT)	All departments
6	Duty Allotment	Department Heads

#	Module	Owner
7	Checklists (weekly, monthly, yearly)	Department Heads
8	Transport Management	Transport Manager
9	Vehicle Records	Transport Manager
10	Daily Trip Updates (onboard/offboard)	Driver / Conductor
11	Announcements and Instructions	JD / Dept Heads
12	Lost and Found	All users
13	Gate Pass, Product Out/Entry Pass	Security + approvers
14	CCTV / Camera Room	Camera Room In-charge
15	File Room Management	File Room In-charge
16	IT Support and Asset Register	System Admin
17	Notifications	System
18	Global Rules	System

4. Module Details and Workflows

4.1 Dashboard and Analytics

- Role-based dashboards with charts; click any chart for detailed data.
- Store: stock levels, low-stock alerts, pending requests. Transport: trips today, vehicles in service, pending maintenance. Housekeeping/Maintenance: open tickets, checklist completion. JD: all departments, comparisons, budget use. MD: full view with audit data.

4.2 Inventory Management

- Product master: name, category, unit, opening stock, minimum stock level.
- Stock in (purchase/new product), stock out (issues), balance, **availability view for all users**.
- Every product and count is listed and visible to the requesting user.
- Items not in the list can be requested as a **new product**.
- Reports: stock register, issue register, low stock, consumption by department.

4.3 Purchase Workflow

Flow:

1. Store (or any department via store request) raises a purchase requirement
2. **Store Officer compares old vendor details** (previous prices, quotes, delivery history)
3. JD approves the selected vendor and quantity
4. Checked against the **budget defined by Finance** (monthly / yearly / event)
5. Purchase order raised → goods received → stock updated
6. Payment handled by Finance (voucher)

New products and library book purchases use dropdown-fetched data so details are not re-entered.

4.4 Request and Approval (Store Issues)

Flow:

1. Requester selects the department (e.g., Store) and views available products
2. Chooses items and quantity and selects approver
3. Approvals by higher authority (DA / Principal for Academics; Department Head / JD for others)
4. Store approves and issues
5. Requester collects; stock reduces automatically
6. If the item is unavailable → becomes a new product / purchase requirement

4.5 Ticketing

- Any user raises a ticket to a department (IT repair, cleaning, maintenance, etc.) and selects the responsible person.
- Status: Raised → Assigned → In progress → Resolved → Confirmed by requester.
- Not resolved or not accepted by the requester → **escalates to the next higher authority** (same logic as complaints).
- Full history retained; no edit or delete.

4.6 Duty Allotment

- Department Head assigns duties by staff, shift, area and date.
- Staff see their own duties; heads see the department roster.
- Applies to Housekeeping, Maintenance, Transport, Security, Camera Room and others.
- Linked to attendance and leave: if a staff member is absent, the head reassigns and the change is logged.

4.7 Checklists

- Types: **weekly, monthly, yearly** (daily [**Proposed**]).
- Created by the Department Head, completed by staff, verified by the head, reviewed by JD.
- Items marked done with date, time, person and optional photo.
- Overdue checklists notify the head and escalate to JD.
- Examples: classroom cleaning, washroom checks, fire-safety equipment, vehicle fitness, electrical inspections.

4.8 Transport Management

- Vehicle details, routes, stops, driver and conductor allocation.
- Transport Manager saves vehicle data, duty allotment and vehicle records.
- Student transport mapping: which student uses which bus; own vs school transport shown in the student profile.
- **TC NOC**: the Transport Manager approves in the TC workflow if the student uses school transport.

4.9 Vehicle Records

- Registration, insurance, FC, permit, pollution and expiry dates with alerts.
- Service history, repairs, fuel and mileage logs, accident or incident records.
- Documents uploaded and linked to each vehicle.

4.10 Daily Trip Updates (Driver / Conductor)

- Driver and conductor update **onboard and offboard** status for each student, for both **home → school** and **school → home** trips.
- Trip record includes driver and conductor details, route, time and vehicle.
- Parents see trip status through the student profile; Transport Manager and Academics (class teacher) can view.

4.11 Announcements and Instructions

- Inter-department announcements and instructions from JD / Department Heads with target audience selection.
- Notifications to selected departments or roles.

4.12 Lost and Found

- Anyone who finds an item takes a **photo** and posts it in announcements.

- Owner claims; the finder or the front desk confirms handover; status closes.

4.13 Gate Pass, Product-Out and Product-Entry Pass

- Requested by PRM or user, approvals as selected by the requester (see Academics).
- Generated pass goes to the **Security profile** for verification, or is printed and approved at the gate.
- Product-out and product-entry passes route to the owning department (e.g., Store) for approval before the pass is valid.

4.14 Camera Room (CCTV)

- Camera list and locations, daily status check (working / not working), maintenance tickets.
- **Footage request:** requester states reason, date, time and area; approved by the Department Head and JD (and MD for sensitive cases); Camera Room provides the clip; every request and download is logged.
- **[Proposed]** Retention period and access log reviewed monthly by JD.

4.15 File Room

- Register of physical files and digital documents: category, owner department, location, status.
- **Issue/return tracking** with request approval by the department head.
- Digital uploads linked to the file entry. Retention rules by document type **[Proposed]**.
- Student TCs, staff files and legal documents may require MD approval to access.

4.16 IT Support and Asset Register

- Ticket handling for PCs, network, printers, software and ERP access issues.
- Asset register: device, location, assigned user, warranty, repair history.
- Manages user creation support, password resets (with audit) and device sync (e.g., attendance device).

4.17 Notifications

- Low stock alerts, ticket updates, checklist reminders, document expiry (vehicles), approval requests, announcements.

4.18 Global Rules

- No edit and no delete after saving; full history retained.

- Filters and PDF/Excel export (with column selection) on all pages.
- Profile switch for multi-role users.
- Audit trail visible to MD (logins, entries, downloads, prints).
- All data is inter-connected across departments.

5. Approval Chains Summary

Process	Initiator	Approval chain	Result
Store request (Academics)	Teacher / any user	DA or Principal → Store	Items issued
Store request (Non-Academics)	Staff	Dept Head → (JD if required) → Store	Items issued
Purchase	Store	SO vendor comparison → JD → Finance budget check	PO raised
Ticket	Any user	Assigned person; escalates upward if unresolved	Resolved
Footage request	Any user	Dept Head → JD (MD if sensitive)	Clip provided
File issue	Staff	Dept Head → File Room	File issued
Duty change	Dept Head	JD notified	Roster updated
Gate / product pass	PRM / user	Approvers chosen by requester	Pass to Security

6. Role-Permission Matrix (draft)

Legend: C = Create, V = View, A = Approve

Module	Staff	Dept Head	JD Assistant	JD	MD
Inventory	V	C (Store)	V	V	V
Purchase	-	C	A	A	V
Store request	C	A	A	A	V
Tickets	C	A / resolve	V	V	V

Module	Staff	Dept Head	JD Assistant	JD	MD
Duty allotment	V (own)	C	A	V	V
Checklist	C (fill)	A (verify)	V	V	V
Transport records	V	C	V	V	V
Footage request	C	A	A	A	A (sensitive)
File room	C (request)	A	V	V	V

7. Integrations

Department	Interaction
Academics	Store requests, tickets, TC transport NOC, gate pass, student bus data in profile
Finance	Budgets, vendor payments, vouchers, purchase checks
HR	Staff attendance and leave drive duty allotment; staff files
MD	Full audit view, final approvals on sensitive items
Security	Gate pass verification
Library	Book purchase requests through the purchase workflow

8. Confirmed Decisions

Updates from review. These supersede earlier wording in sections 1 to 7 where they differ.

- 1. Purchase and approval limits:** Not hard-coded. **Finance sets the approval limits per role** (for Academics and Non-Academics alike). A Non-Academic Department Head can approve up to the limit set by Finance; above it, the request is **redirected to Finance by the head**. No fixed amount thresholds are defined in the ERP design.
- 2. Checklists:** Daily, weekly, monthly and yearly checklists are all supported.
- 3. Transport and GPS:** Every bus has GPS. The ERP links to the GPS feed so that authorised users (Transport Manager, class teacher chain, and the child's profile view) can see the **route and live bus location**.

4. **Driver screen:** Drivers and conductors have a **separate screen only for onboarding and offboarding**, by trip type: pick up from home or pick up from school. One bus can run **multiple scheduled trips or routes at different times**. Before the first trip, the Transport Manager configures the start time, end time, route map and the student list.
5. **Transport data from Finance:** Student details and **fee payment status (paid or pending)** sync directly from Finance into the transport records.
6. **Camera Room:** A **separate department**. When any issue is identified, the Camera Room marks and stores the relevant footage. Any Department Head can send a footage request to the Camera Room.
7. **File Room:** Handles file maintenance and record keeping. Access and issue requests are approved by the requester's **higher department authority**.
8. **Security:** Documented as a department with **two roles** (see 9.1).
9. **PRO:** Responsible for **government liaison** (see 9.2).
10. **Housekeeping and Maintenance:** Kept as **separate departments** with separate heads and staff.
11. **Store, returnable items:** When a product is issued from the store, the issuer marks it **Returnable or Non-Returnable** with details. Returnable items are tracked until returned.
12. **Store, product out:** Any store-related product leaving the premises needs **confirmation from the owning department**.
13. **Store, new product in:** When a new product arrives, it **automatically goes to the owning department for confirmation** before it is added to stock.

9. Additional Modules Defined

9.1 Security

Two roles:

Role	Rights
Security Supervisor	Duty allotment for security staff, instructions, announcements, plus additional supervisory features and all records.
Security Officer (normal)	Day-to-day records only: visitor entry, gate logs, vehicle entry and exit, and pass verification.

Features:

- Inter-department announcements and instructions.
- **Visitor entry** (name, purpose, whom to meet, time in and out, ID and photo **[Proposed]**), linked with PRM appointments so the host is notified.
- **Gate logs** for people, vehicles and materials.
- Verification of gate pass, product-out and product-entry passes.
- Incident reporting to the Security Supervisor and JD **[Proposed]**.
- Checklists (daily, weekly, monthly) and patrol rounds **[Proposed]**.

9.2 PRO (Public Relations Officer) – Government Liaison

- Tracks government correspondence, applications, permits, affiliations and inspections **[Proposed]**.
- Records each case with department, authority, submission date, deadline, status and documents uploaded.
- Reminders for renewals and deadlines; status updates visible to JD and MD.
- Works with the File Room for document custody and with Finance for fees or challans.

10. Final Clarifications and Recommendations

Confirmed

- **File Room confidentiality:** Set **per file at the time of upload or first entry**. The person adding the file defines who needs permission to access it (for example, the Academic Head for some files, the Admin Head for others). Access requests for that file then route to the designated approver.
- **PRO scope:** Handles **all school and government-related matters**. The scope is kept broad and not limited to a fixed list of work types.

Recommendations (since these were not decided)

Item	Recommendation
Camera footage retention	Make it a setting. Suggested default: 30 to 60 days of routine footage, with footage marked for an issue kept until the case is closed by the requesting head and JD. Release of marked footage is logged.

Item	Recommendation
GPS integration	Get the name of the GPS vendor from the Transport Manager. Most vendors provide a live-location API or a tracking link, so the ERP can either fetch coordinates or open the vendor view. Treat as a dependency for later and design the screens first.
PRO case tracking	Keep a simple case record (subject, authority, dates, status, documents, next action) that works for any government matter, so the scope can stay broad.

Status: No blocking items remain. The two vendor-dependent items (footage retention policy and GPS provider) can be decided later without changing the design.

Next suggested department: HR.
