

ERP Documentation – 5. Audit Department

Version 0.1 (draft). Source: QMIS Audit SOP (17.08.25, Draft 1, drafted by JD Audit) and your earlier notes. Items marked **[Proposed]** are my suggestions for you to confirm.

1. Purpose and Scope

The Audit department runs **process audits and quality audits** across the school to ensure academic excellence, administrative efficiency, compliance and continuous improvement. In the ERP, the Audit department turns the SOP's daily, weekly, monthly, fortnightly and quarterly audit plan into **scheduled audit tasks, checklists, findings, corrective actions (CAPA) and reports**, replacing the Google Sheets and registers used today.

Scope (from the SOP):

- **Academics:** teaching-learning, assessments, lesson planning, student performance.
- **Administration:** IT, Maintenance, Housekeeping, Stores, HR, Finance, Transport, Security.
- **Student and parent services:** counselling, communication, co-curricular activities.

Objectives: compliance with school policies, board norms and statutory requirements; monitor process effectiveness; identify gaps and risks; recommend corrective and preventive actions; drive continuous improvement.

2. Roles (RASCI from the SOP)

Role	RASCI	Responsibility in the ERP
Audit Executives	Responsible	Perform audits, fill checklists, record findings and evidence.
Joint Director Audit (JD Audit)	Accountable	Owens the audit plan, reviews findings, assigns CAPA, reports to MD.
Entire team	Support	Provide records and access during audits.
School community	Consulted	Interviews, feedback.
Managing Director	Informed	Receives reports and the full dashboard.

Quality audit members use the designations **SPQA** and **PQA** from the SOP **[confirm the full names]**.

3. Module Map

#	Module
1	Audit Plan and Scheduler
2	Process Audits
3	Quality Audits
4	Audit Checklists and Process Checks
5	Findings, Ratings and Risk Classification
6	Corrective and Preventive Actions (CAPA)
7	Follow-Up and Action Taken Reports (ATR)
8	KPI / BSC Scoring
9	System Audit Trail (logins, entries, downloads, prints)
10	Reports, Dashboard and Continuous Improvement
11	Surprise Audit

4. Module Details

4.1 Audit Plan and Scheduler

The audit plan is stored in the ERP as **recurring audit tasks**. The system generates each task on its date, assigns the Audit Executive, shows the duration, and tracks completion.

Frequency	Examples from the SOP
Daily (38 items)	Roll call audit, DSR filling audit, student attendance (Edumerge, registers, master calculation), disciplinary and parent-concern updates, student dispersal, Zero Hour (morning and evening), CCTV and PA system checks, staff class punctuality, transport morning/evening GPS and issues, ID card issuance, gate pass checking, housekeeping rounds and washroom audit, sickbay cleanliness, security register checks, walkie-talkie all-well announcement every 40 minutes.

Frequency	Examples from the SOP
Weekly	Monday: grievance box labelling, lost and found. Tuesday: camera display arrangement, security files. Wednesday: hostel checking. Thursday: MD room and PRM file check. Friday: front office files, lost and found (admin). Saturday: deep cleaning KG.
Fortnightly	Day 1 and day 16: login password change.
Monthly (by weekday and week)	Mondays: transport files, HK files, first aid boxes, control room files. Tuesdays: ASA and ECA registers, learning walks. Wednesdays: rifle club, badminton, kidz gym, stores. Thursdays: DA + JD Admin, Admin + Finance, HR + Audit, Principal + CCTV office. Fridays: Noolvanam, Enthiravanam, file room, cyber studio. Saturdays: classroom rounds and auxiliary venues.
Monthly (by date)	2nd attendance last page; 3rd star of the month (ERP); 4th staff reading and BFIT report receipt, students emergency list; 5th fire evacuation maps; 6th book review; 10th stores requirement, transport paid/unpaid check, QAB report; 12th and 23rd pending updates to MD; 15th website; 25th concession; 27th digital anecdotal; 28th and 30th students of the month; 29th lesson plan of the following month; 30th to 3rd staff salary consolidation; security parade (monthly).
Quarterly	Smart tail, exam portions checking, new academic plan and exam plan.

The SOP's monthly date list has blank dates (7th, 8th, 9th, 11th, 13th, 14th, 16th to 22nd, 24th, 26th). The scheduler allows **adding new audit items to any date [Proposed]**.

4.2 Process Audits

Process audits check whether operations follow procedure. The SOP defines **40 process audit components**, including: student assembly, teacher class observation, staff punctuality, workbook/notebook, journal, lesson plan, auxiliary activities, book review, bulletin board, attendance registers (manual and Edumerge), digital anecdotal, homework update, star of the month, marks update, question papers and answer scripts, student disciplinary issues, parent concerns, grooming issues, late comers, ID cards, cover duty

sheets, activities, event risk assessment, health and safety, policies/SOPs, QAC-BOG, strategic plan, internal action plans, Transport, Stores, Housekeeping, HR, Front Office, Cafeteria, Control Room, Security, Sickbay and Counsellor Room.

Every component has a checklist of **process checks** (see 4.4).

4.3 Quality Audits

Quality audits are carried out by SPQA and PQA members on academic delivery. Components from the SOP include: class observation, notebook audit (5 notebooks from 2 classes), journal audit, auxiliary activity audit, homework audit, documentation (DSR/GSS), Grade 1 to 8 Zero Hour, KG2 to Grade 3 reading program, spell-well audit, observee meetings, DEM, roll call, assembly, ASA observation, weekly worksheets, bulletin boards, CA score sheet update, KPI audit, BFIT and academic lesson plan audits, CA question paper audit, event risk management, smart tail evaluation, answer script evaluation, exam audit, calendar activities audit and review meeting, additional audit (circulars and monthly report), and lab audit.

Each item carries a **sampling rule and frequency** (for example days x classes x audit members) and a **duration**, as in the SOP.

4.4 Audit Checklists and Process Checks

Each audit component has a checklist built on the SOP's **five process-check components**:

1. **Input verification:** are resources, data or materials correct before starting?
2. **Procedure adherence:** are team members following the correct steps?
3. **Output review:** is the result consistent and timely?
4. **Documentation:** is evidence recorded and traceable?
5. **Feedback and correction:** are issues identified and corrected quickly?

Checklist items are maintained by JD Audit. Executives record the result, remarks and **evidence (photo/file)**.

4.5 Findings, Ratings and Risk Classification

- Each finding is rated **Compliant, Minor Non-Conformity** or **Major Non-Conformity**.
- Each risk is classified **High, Medium** or **Low**.
- Findings are shared with the management and the respective department heads.

4.6 Corrective and Preventive Actions (CAPA)

- For each non-conformity, JD Audit assigns a corrective action with an **owner and deadline**.
- The owner records the action taken; the auditor **verifies closure**.
- Overdue actions escalate to the next higher authority and to the MD [**Proposed**].
- Closed items go into the **continuous improvement log**.

4.7 Follow-Up and Action Taken Reports (ATR)

- Track implementation of corrective measures.
- Follow-up on ATRs for the **QAC-BOG, Strategic Plan and internal action plans**.
- Verification of closure of non-conformities before an item is marked closed.

4.8 KPI / BSC Scoring

- The SOP refers to the **Audit BSC-KRA-KPI enclosure (14.05.25)** for KPIs.
- Audit results feed the department and staff **BSC audit score**, which HR uses in performance review, increment and promotion.
- Detailed KPIs to be added once the enclosure is shared.

4.9 System Audit Trail

Part of the Audit role in the ERP, visible to the MD and JD Audit:

- **Login details** (who, when, from where).
- **Entry details** (who created which record and when).
- **Page downloads, print and download logs**.
- Because no user can edit or delete data, the trail is complete and permanent.

4.10 Reports, Dashboard and Continuous Improvement

- **Quarterly review meetings** with audit findings (SOP section 10).
- Audit results integrated into the school improvement plan; benchmarking with peer institutions.
- Dashboard for the MD and JD Audit: audits due and completed, findings by department, major non-conformities, risk levels, CAPA status, trend over time, department comparisons.
- Filters and PDF/Excel export on all pages.

4.11 Surprise Audit

- Auditees are notified in advance **except for surprise audits**.
- JD Audit can create an unscheduled audit without prior notification to the auditee **[Proposed]**.

5. Audit Methodology Flow

Step	Activity in the ERP
1. Planning	Define scope, checklist per department, notify auditees (except surprise), assign audit team.
2. Data collection	Interviews, observation, document verification, sampling. Evidence uploaded.
3. Evaluation	Check against SOP/policy/statutory; rate Compliant / Minor / Major.
4. Reporting	Share findings with management and heads; classify risk; recommend actions with deadlines.
5. Follow-up	Track corrective measures, verify closure, update the improvement log.

6. Role-Permission Matrix (draft)

Legend: C = Create, V = View, A = Approve

Module	Audit Executive	JD Audit	Dept Head	MD
Audit plan	V	C / A	V	V
Checklists	C (fill)	C / A	V	V
Findings	C	A	V (own dept)	V
CAPA	V	C / A (verify)	C (action taken)	V
KPI / BSC	V	C	V	V
System audit trail	–	V	–	V

7. Integrations

Department	Interaction
Academics	Lesson plans, attendance, DSR, marks, star of the month, homework, notebooks, ASA/ECA
Non-Academics	Transport GPS and entries, stores, housekeeping, control room, security, sickbay
HR	BSC audit score, performance review, SOP/JD compliance
Finance	Concession, paid/unpaid checking, salary consolidation
MD	Receives reports, full audit and dashboard

Academic and operational data is read directly from the ERP wherever possible, so the auditor verifies instead of re-entering.

8. Decisions, Definitions and Expanded Roles

*Updates from review. Items marked **[Proposed]** were defined by me because they were not available in your notes; please correct any that are wrong.*

8.1 Confirmed

- **Edumerge is replaced by this ERP.** Attendance, homework update, marks update and star of the month are audited directly from ERP data. The audit items that compared Edumerge with manual registers become ERP-vs-register checks until registers are retired.

8.2 Proposed decisions

Question	Proposed decision
Google Sheets (Quality and Process formats)	Replace completely with the ERP. Audit checklists, results and history move into the Audit module. Existing sheet data can be imported once as read-only history.

Question	Proposed decision
BSC-KRA-KPI enclosure	The ERP supports a KPI template (KRA, KPI, target, weight, source, score). The enclosure will be loaded as configuration once shared. Until then, the BSC section stays a placeholder.
Finding visibility	The audited Department Head sees the corrective action assigned to them immediately . The full finding report and ratings are visible to the Department Head after JD Audit reviews it . The MD sees everything at once.
Blank dates in the monthly schedule	Treated as free dates . JD Audit can add audit items to them at any time.
Surprise audit	Created by JD Audit without notifying the auditee in advance.

8.3 Abbreviations **[Proposed]**

Term	Meaning used in this document
GSS	Google Spreadsheet (current tool, as the SOP's audit formats are Google Sheets)
SPQA	Senior Process and Quality Auditor
PQA	Process and Quality Auditor
ASA	After-School Activities
ECA	Extra-Curricular Activities
SOM	Student/Star of the Month
ATR	Action Taken Report
QAC-BOG	Quality Assurance Committee / Board of Governors follow-up
HSC	Health, Safety and Cleanliness
DSR	Daily Status Report (kept as in the SOP)
DEM, QAB, BFIT	Names kept exactly as in the SOP until their meanings are confirmed by JD Audit

9. Expanded Audit Roles **[Proposed]**

Role	Responsibility	Typical audits
JD Audit	Accountable. Owns the plan, reviews findings, assigns CAPA, reports to MD, approves closure.	All
Senior Process and Quality Auditor (SPQA)	Leads quality audits and reviews PQA work; can do all quality audit items.	Class observation, notebook, lesson plan, exam audit
Process and Quality Auditor (PQA)	Performs quality and process audits and records findings.	Class observation, notebook, journal, homework, documentation
Audit Executive	Responsible for daily and routine process checks.	Roll call, DSR, attendance, gate pass, transport GPS, housekeeping rounds
Control Room Auditor	Daily control room checks (CCTV, PA system, GPS, walkie-talkie all-well announcement).	CCTV, GPS, PA system, staff punctuality
Auditee / Department Head	Receives findings, owns corrective actions, uploads evidence of closure.	Own department
Action Owner	The person assigned a specific corrective action.	Assigned CAPA
MD (Informed)	Sees reports, dashboards and the full system audit trail.	All

All audit roles follow the same global rules: no edit and no delete, filters and export on every page, and every action is logged.

Next suggested: MD, then Admin.
